

After-Accreditation Promotional Materials for Enduring Activities

Environmental Health and Land Reuse (EHLR) Certificate training Module 5: Measuring Success: Evaluating Environmental and Health Change

WD 4776

Program Description: This enduring activity is designed to increase participants' capacity and skills associated with land reuse activities. The goal of Module 5: Measuring Success: Evaluating Environmental and Health Change is to provide a basic overview of measuring success, or the positive (or negative) community changes that occur throughout the lifecycle of the project.

Objectives:

At the conclusion of the activity, the participant will be able to:

1. Name three public health categories for which there are community-driven public health indicators associated with land reuse.
2. Recognize public health indicators associated with land reuse in three public health categories: environment, health, and economy.
3. Recognize how to use the Action Model, including related public health indicators, to measure redevelopment plan outcomes.

**Faculty/
